

Advanced Laser Marking Technology at MD&M Minneapolis

MDT Staff

In booth 1605 at MD&M Minneapolis, TRUMPF will show the latest laser technology for marking, welding, and cutting applications found in medical device manufacturing.

In the booth, TRUMPF will demonstrate the TruMark 5020, the ultimate in advanced laser marking technology. With its fiber laser delivery, it is designed for marking in the lower frequencies, up to 1000 kHz. Designed for the demands of an industrial environment, the TruMark laser offers high pulse repetition rates, which means an impressive marking speed.
