

Electronic Locking Hardware Components

MDT Staff

[Accuride](#) [1] has announced two new security hardware products featuring electronic locking technology: a ball bearing slide with an integrated lock and a stand-alone lock. Model 38EL is full extension slide with an integrated electronic locking mechanism. Features include:

- A 100-pound load rating.
- A standard ½" side space.
- Availability in even lengths from 14" to 28".
- A lock mechanism (integrated and stand alone) withstands up to 150 pounds of force.
