

Medical-Grade High-Efficiency Triple Output 110 Watt Power Supply

SL Power Electronics, a division of SL Industries (NYSE/AMEX: SLI) and an industry leader in the design and manufacture of medical power supplies, today announces the addition of the triple output MINT3110 to its high density, open frame AC/DC medical-grade power supply family. The MINT3110 family is ideal for medical applications in surgical and laboratory instruments requiring low leakage, multiple outputs and small footprint.

Surpassing the strict requirements of IEC 60601-1 3rd edition, the MINT3110 models feature:

- Power: 110W with forced air and 80W convection cooled
- Form factor: 2" x 4" x 1.3", ideal for 1U height and space constrained applications
- Universal Input: 90 - 264 VAC
- Outputs: 5/±12V, 5/±15V, 5/±24 V
- Control signals: PF/DC OK
- Lowest earth leakage current at 200μ amps in the market
- Class B Radiated EMI
- 2 MOPP (means of patient protection) safety
- Class I and Class II configurations

The triple output power capabilities eliminate cross talk and provide tightly regulated DC power in a variety of configurations that save user's costs by eliminating the need for numerous DC/DC converters. All three outputs are tightly regulated.

"Our customers rely on SL Power to deliver the the highest level of power performance and reliability," said Greg Harris, executive vice president of sales for

SL Power. "Now, customers can reap the benefits of our new MINT3110 triple-output power supply that features high density, energy efficiency and a small footprint at a very affordable cost. Our customers have tested the MINT3110 and have found it runs much cooler than competitive units and is nearly half the size."
