

Happy Easter from JK Lasers.wmv

jklasers

To celebrate Easter, JK Lasers has cut a greetings message using a 500W fiber laser (JK500FL). The Easter egg design was cut at 2.5m per minute on 1mm mild steel, a common material used in many industrial applications, particularly laser cutting. The high beam quality and power stability of the JK500FL, combined with the use of a compressed air assist gas, resulted in a dross free cut. For more information about JK Lasers' range of Watt to kilowatt fiber lasers, visit www.jklasers.com/laser-products.
