

Advances in Stepper Motors: The Disc Magnet Technology

Submitted by Guest (not verified) on Fri, 05/07/2010 - 12:50pm Portescap, a Danaher Motion Company

The fundamental advantage of a stepper motor, speed and position control without feedback, is becoming more attractive to industries sensitive to cost, or to overcome the reliability problems linked to the mechanical commutation system of DC motors. This presentation provides a comprehensive overview of the technology.
