

Persistent Publish/Subscribe Messaging in Medical Devices

Submitted by sfenske on Wed, 07/11/2012 - 12:12pm QNX

Many medical devices must bring together a disparate array of hardware and software components, as well as support a sophisticated, multi-layered Human-Machine Interface (HMI). Persistent Publish/Subscribe (PPS) messaging offers versatile, easy-to-use and reliable messaging that simplifies system design and facilitates HMI implementation.
